Intro

WordPress is a powerful website platform that combines total flexibility with an incredible price point...FREE!

When we design websites for our customers or for our own means, we almost always turn to WordPress. We love the flexibility and price, but the real “selling point” is the community built around WordPress.

There is an entire community of programmers, developers and designers who are contributing to the WordPress ecosystem. These people create tutorials to help beginners, or they create plugins that offer all sorts of functionality.

This guide was created to show you the way to some the best of these resources.

If you are interested in WordPress or already using it, you will find something helpful in this guide...

WordPress Video Tutorials

The online video explosion that we have seen the past decade has been nothing less than extraordinary. The web is now littered with countless videos about every single subject you can imagine...and I am sure more than a couple we can't even fathom.

WordPress is a popular video topic, and the following videos are the best online tutorials for the WordPress user:

Free Plugins

Having loads of video tutorials to choose from is nice, but it isn't the only benefit from the "WordPress Community". Developers and programmers across the globe have been creating WordPress plugins for years.

Ever since WordPress 1.2 (2004) plugins have been an integral part of the WordPress experience. Since that time over 19 000 plugins have been created and that number grows daily!

In this section we will point you to some of our favorite free plugins.

Affiliate Marketing

Amazon Affiliate Link Localizer
Automatically changes any Amazon link on your site to use your affiliate ID.
http://wordpress.org/extend/plugins/amazon-affiliate-link-localizer/
